**COMMUNICATION REPORT**

Person Contacted <u>Jon Bornholm</u>	Project No. <u>G-8026</u>
Company <u>US EPA Region IV</u>	Date <u>8/3/89</u> Time <u>8:50am</u>
Address <u>345 Courtland Street</u>	Client <u>PRPs</u>
<u>Atlanta, Georgia</u>	Re <u>Medley Farm Site RI</u>
	<u>Phase IA Ground Water Sampling</u>
Telephone No. <u>(404) 347-7791</u>	Telephone Conversation <u>X</u>
Recorded By <u>Jim Chamness</u>	Office Conversation _____

1. SEC proposed to sample bedrock wells BW-2 and BW-4, and saprolite wells SW-3 and SW-4, since clusters have not been installed at the MW-2 and MW-4 locations as originally planned and written in the approved P.O.P. The saprolite well, SW-4, originally proposed to be adjacent to BW-4 was relocated as a result of discussions with SCDHEC to a location approximately 100 feet south of the existing SCDHEC well. Ground water was not encountered in the saprolite at the MW-2 location, therefore a saprolite well (proposed SW-2) was not installed at that location.

SEC proposed to sample SW-3, located immediately north of former disposal/storage areas, in place in SW-2 which was not installed.

2. Jon approved sampling approach.
3. EPA will collect split samples from SW-4 and BW-4.
4. SEC will try to schedule sampling so that one of the splits can be collected Monday afternoon (8/7) and the other Tuesday a.m. (8/8).
5. In accordance with the telephone message to Gordon Peterson from Jon Bornholm (8/8/89) we understand that the EPA oversight contractor will not be available to collect split samples during this ground-water sampling effort. SEC will proceed with Phase IA ground-water sampling as planned.
